“Math has powers! So, how do I interpret it?!!”

Presented by Chris Flygare

Come for a refresher course in ASL number systems, as well as the proper use of signing space for certain math concepts, such as geometrical shapes, 3D descriptions, and how to solve linear equations.

We will end with a Q&A session to discuss math vocabulary and approaches to produce conceptually accurate interpretations in your daily work.

This training will be presented in ASL

+ − × ÷ ± / < > ≤ ≥ ≠ + − × ÷ ± / < > ≤ ≥ ≠

Saturday, January 24, 2015
9 am to 12 pm

Cost: FREE

3 CEHs and .3 CEUs will be available
